"Be the change that you want to see in the world. Now!"

Company Recruitment Team

November 29, 2025

Opera.

Job Application for Internship

Dear Mr./Ms.,

About Me

I'm a student who is exploring his interests and skills. I'm amazed by the creativeness of software development and how it effects people's life even sometimes without be noticed by them.

When I'm not working, I usually spend time with my drum sticks (I can't carry the drum set with me everywhere but sticks come with me). I grow up a little bit, but I am still a kid at heart, love to paint and draw, play video games, reading science-fiction.

I really love to learn and experience new things. I'm looking for new challenges and problems to solve.

WhyOpera?

Opera is the one of my favorite internet browser. I want to be a part of team that developed such a neat and fast software.

WhyMe?

I'm one of the most successful students in my school and even my country. I'm also studying Electrical · Electronics Engineering which gives me completely different perspective. In addition to my academic success, I have experience with different kinds of software development such as Native Android and React Native mobile development, Java and Node Js Backend development, web development with various technologies such as REST API.

Sincerely,

Barlas Berkay
